

Mohammad Fazel Khorrami

Software Engineer | Full-Stack Developer

fazel.khorramii@gmail.com | linkedin.com/in/mohammadfazel-khorrami | github.com/mfazelkh99

PROFESSIONAL SUMMARY

Software Engineer and Full-Stack Developer focused on building practical web applications, CRM systems, automation tools, and Python-based bots. Experienced in taking software projects from concept to implementation, including system design, backend development, database integration, API integration, and deployment. Strongly experienced in AI-assisted software development, using modern AI tools throughout the development lifecycle to accelerate problem solving, debugging, implementation, and delivery of real-world software projects.

TECHNICAL SKILLS

Programming & Web Development — Python · PHP · JavaScript · TypeScript · React · Next.js · HTML / CSS · Tailwind CSS

Backend & Database — MySQL · SQLite · REST APIs · Webhooks · Database Design & Integration

Software Development — Full-Stack Web Development · CRM Development · Business Automation · Bot Development · API Integration · Authentication & Authorization · Git & GitHub · Debugging & Problem Solving

AI-Assisted Development — AI-Assisted Software Development · AI-powered Development Workflows · Rapid Prototyping with AI · AI-assisted Debugging & Refactoring · Building Real-World Projects with AI-assisted Development

PROFESSIONAL EXPERIENCE

Computer Instructor / Computer Vocational Teacher · Ministry of Education — Iran

Oct 2022 – Present

- Teaching computer science, networking, and software-related subjects.
- Delivering practical and technical training in computer and network technologies.
- Explaining complex technical concepts through practical examples and hands-on instruction.
- Developing technical problem-solving and communication skills through continuous interaction with students.

SELECTED PROJECTS

IranCell CRM

Technologies: HTML · CSS · JavaScript · PHP · MySQL

A customer management platform designed for managing customer information, requests, sales workflows, and administrative operations.

Key Features: Customer Management · Admin Dashboard · Authentication · Excel Export · Customer Status Management · Multi-platform Data Integration

Zarfund Customer Management & Automation System

Technologies: Python · Bale API · SQLite/MySQL · Flask · JSON · Excel

A Python-based customer acquisition, management, and marketing automation system built around a messaging bot.

Key Features: Automated customer registration and data collection · Persistent customer records · Lead generation through bot-based advertising campaigns · Customer follow-up and tracking workflow · Excel export for customer management and follow-up notes · Admin dashboard · Bulk messaging campaigns · Registration follow-up and customer outreach · Automated notifications and status tracking

Personal Developer Portfolio

Technologies: Next.js · TypeScript · Tailwind CSS · Framer Motion

A responsive developer portfolio built to showcase software projects, technical skills, and professional experience, with interactive scroll-based animations and responsive UI.

Key Features: Responsive UI · Component-based architecture · Interactive scroll animations · Language Switcher · Online Support Chat

Irancell Mini App

Technologies: HTML · CSS · JavaScript · PHP · MySQL

A web-based customer registration and service platform integrated with the CRM system.

Key Features: Customer Registration · CRM Integration · Data Synchronization · Service Request Management

Irancell Bale Bot

Technologies: Python · Bale API · MySQL · JSON

A business automation bot designed to collect customer information and synchronize data with the central CRM database.

Key Features: Customer Data Collection · CRM Synchronization · Automated Workflow

EDUCATION

B.Sc. in Computer Engineering · Shahid Rajaee Teacher Training University — Tehran · 2022
